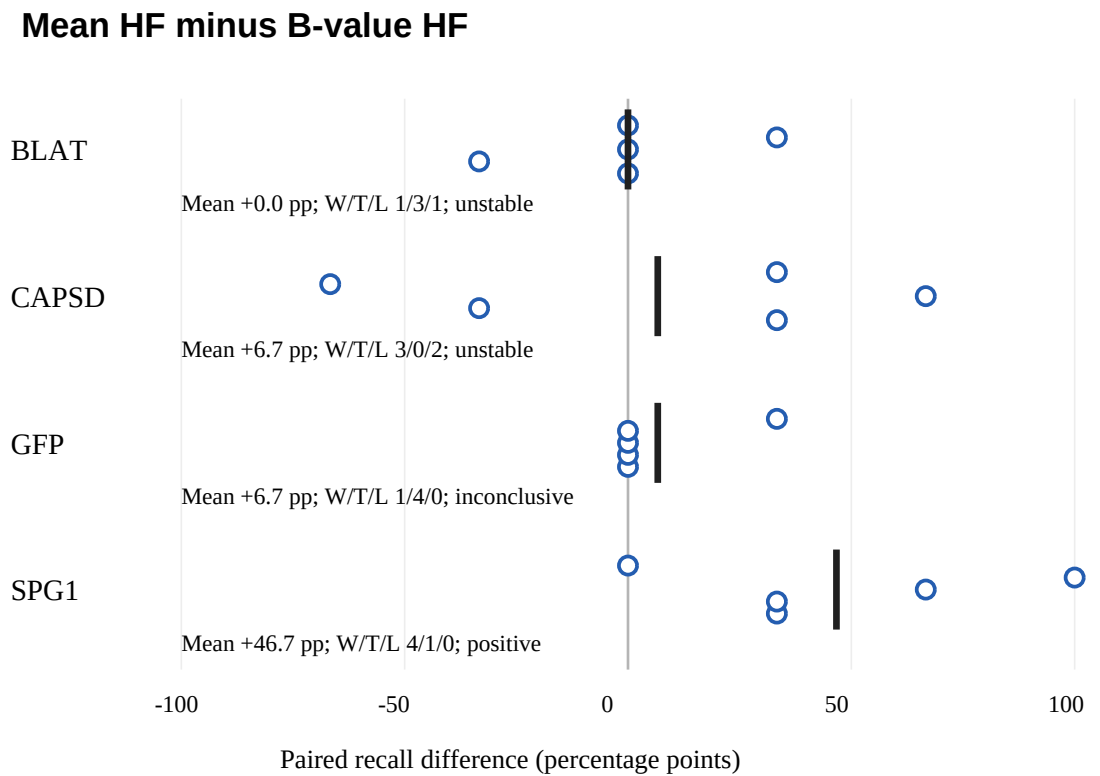
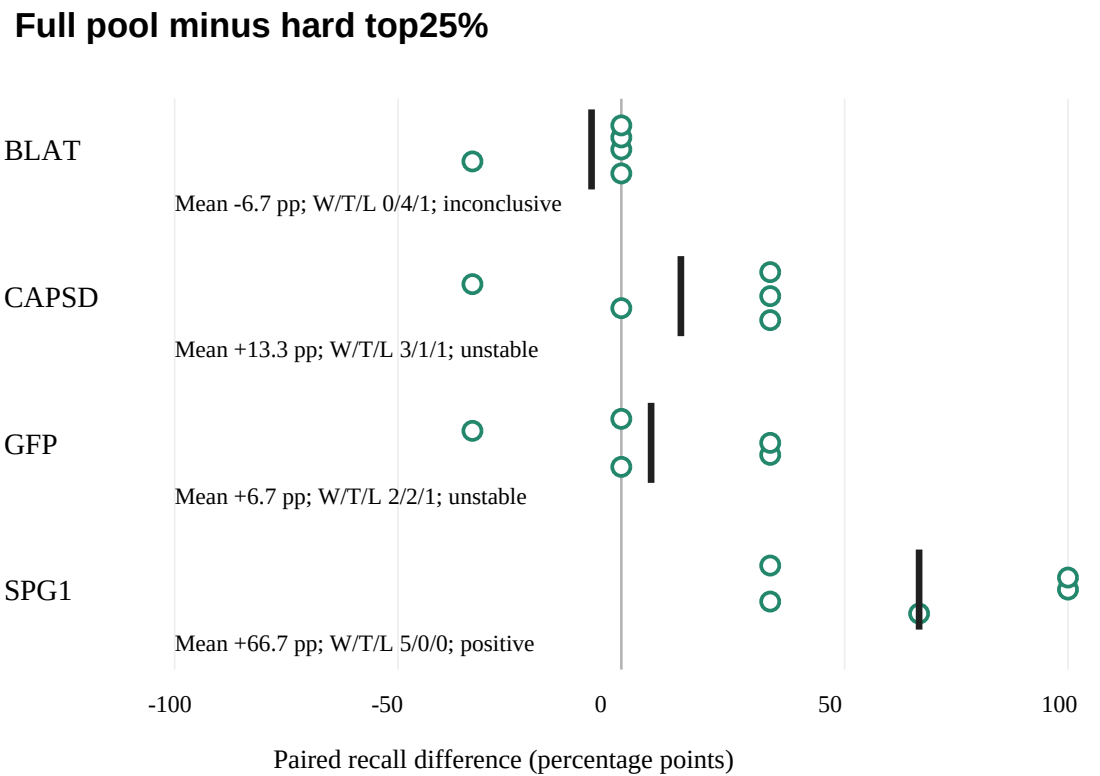
M6 real-proxy bridge: paired discovery effects

Top 1% recall at cost cap 6400; each circle is one matched initialization; bar is the five-seed mean.





All arms: same 16 initial HF + 256 paid LF, then 45 HF; four known 256-candidate pools, ESM1v, five seeds.

Hard25 reuses matching E5 trajectories. Direction labels are descriptive rules, not significance or equivalence tests.
